PROFILE

I am a junior software developer who has good problem solving skill, easy to adapt, fast learner and good basic knowledge in both Python and JavaScript programming languages. I like to learn new things that can be used in software development.

SKILLS

- Python Programming Language
- Software Development
- DBMS
- Object-oriented Programming
- Django Framework
- HTML, CSS and JavaScript

PROJECTS

LIGHT AUTOMATION APPLICATION USING RASPBERRY PI

github.com/dunnohowtoplay/Light-Automation-App

- Build and developed application from scratch with sdlc method using python programming language
- Worked well with the given deadlines

VIRTUAL REALITY GAME ADDITION OF THOUSANDS, ANDROID BASED APPLICATION

- Developed a virtual reality game using unity
- Can find out what is needed to create the desired program without learning the programming language used as a whole

SIMPLE BLOG WEBSITE USING DJANGO FRAMEWORK

github.com/dunnohowtoplay/CoreyMS-Blog

- Follow Corey Schafer's youtube tutorial to understand how the django framework works
- Added a comment feature that is not available in the tutorial
